## PERSONAL INFO

I am a front-end developer at Allfront.io. I am passionate about my work and my personal contribution to the world of modern web development and design.

## EXPERIENCES

### Allfront.io - "Stelini Consulting" EOOD (2022 – Currently)

#### Front-end Developer

The company helps startup businesses to efficiently begin their websites and apps. I have worked with the following companies:

- Moblox - A mobile service operator for small businesses. <https://moblox.com/>
- Legaleyse - This monitoring platform provides real time statistics to insure that gaming companies have the right regulations. <https://legaleyse.com/>
- SoloTrvlr - A digital platform for independent female solo travelers. <https://www.solotrivr.com/>
- Forest Holidays - They cater to people who are looking to create memorable outdoor experiences and reconnect with nature. <https://www.forestholidays.co.uk/>

The technologies I have used to make those apps are as follows:

Angular, GraphQL, React, JS, TypeScript, CSS, SCSS, Next.js, Node.js and Redux.

### "Medlink Students" EOOD (2021 - 2022)

#### Front-end Developer

The company works with foreign students that want to receive an education in medicine. My main responsibilities were to improve the conversion rate by making the website as easy and understandable for the students. The tools that I was using were HTML, CSS, JS, React, PHP, Node.js, Next.js and jQuery. One of the first things I did for the company was to make a couple of quick and easy solutions by changing the websites primary colors, which improved the website almost immediately. I made the application look more modern and usable. Also I created a search bar and added the functionality so the students can navigate easier throughout the website. Those are just among the main things that I improved, with which the approximate upgrade in the conversion rate was around 5%.

### "Sugarhigh Studios" EOOD (2020 - 2021)

#### Front-end Developer

Sugarhigh Studios main income came from freelancing. My responsibilities were to create successful, responsive websites that are fast and easy to use. The main area of my expertise at this time is front-end development, HTML, CSS, JS, Node.js, Next.js and React. Small and medium web apps, custom plugins, features, animations and interactive layouts.
